Product Description

The NMB 06023GA-24N-AU-05 is a compact 24V DC centrifugal blower fan measuring 60mm x 60mm x 23mm. Operating at a rated current of 0.17A (4.08W), this blower is engineered for efficient spot cooling or airflow in confined spaces, such as projectors, small servers, or industrial control units. It achieves a rotational speed of 5000 RPM, delivering approximately 8.5 CFM of airflow with a static pressure of 0.803 inch-H₂O (200 Pa). Its noise output is 41.0 dBA. The fan is equipped with ball bearings for a long operational life. Connectivity is typically via 4-wire leads, which include a pulse sensor for speed monitoring and a PWM input for precise speed control. Integrated features also include auto-restart and polarity protection, ensuring reliable and controlled performance.
