Product Description

The NMB 06920GA-12N-AL is a compact DC Centrifugal Blower Fan from NMB Technologies, designed for efficient air movement in confined spaces. Operating on 12V DC power, it draws 0.25A of current, resulting in a 3.0W power consumption. Measuring 69mm x 69mm x 20mm, this blower is well-suited for cooling applications in devices where air needs to be pushed through restrictive pathways, such as projectors, compact servers, and specialized electronics. It rotates at a speed of 4100 RPM, delivering an airflow of 7.1 CFM and generating a static pressure of 0.60 inch-H₂O, making it effective for directed cooling. With a noise level of 33 dBA, it provides moderate acoustic performance. Equipped with 2-wire leads and durable ball bearings, the fan boasts a life expectancy of 70,000 hours at 25°C. It is designed to operate reliably within a temperature range of -10°C to 70°C and includes auto restart and polarity protection features, ensuring dependable operation.
