## Product Description

---

The NMB 08025DA-24P-BU is a high-performance 24V DC axial fan, precisely measuring 80mm x 80mm x 25mm, manufactured by NMB Technologies Corporation. This fan is engineered for demanding cooling applications that require powerful airflow and static pressure. It features robust ball bearings, ensuring a reliable operational lifespan of 70,000 hours at 40°C. This fan operates at a high speed of 7500 RPM, delivering a substantial 80 CFM of airflow and generating considerable static pressure of 0.85 inches of H2O. Due to its high performance, it produces a noise level of 58 dBA. Equipped with 4-wire leads, this model includes both PWM control for precise speed adjustment and a tachometer output for real-time RPM monitoring. The NMB 08025DA-24P-BU is an excellent choice for cooling server equipment, networking devices, power supplies, and other high-density electronic systems where efficient, reliable, and controllable high-static pressure cooling is essential for maintaining optimal operating temperatures.

NMB brand new original 08025DA-24P-BU 24V 0.35A 8025 8CM axial current heat dissipation fan

Model: 08025DA-24P-BU

Manufacturer: NMB Technologies Corporation

Type: DC Axial Fan

Dimensions: 80mm x 80mm x 25mm

Nominal Voltage: 24V DC

Current: 0.35A

Power Consumption: 8.4W

Speed: 7500 RPM

Airflow: 80 CFM

Static Pressure: 0.85 In H2O

Noise Level: 58 dBA

Bearing Type: Ball Bearing

Life Expectancy: 70,000 Hours (at 40°C)

Termination: 4-wire leads

Frame Material: Plastic

Impeller Material: Plastic

Features: PWM Control, Tachometer, Auto Restart, Polarity Protection.
