Product Description

The NMB 11925SA-12R-BM is a high-performance 12V DC axial fan, measuring 119x119x25mm. Designed for robust cooling applications, it features ball bearings for excellent durability and a long operational lifespan. Drawing 0.86A of current, this fan is engineered to deliver a significant amount of airflow and static pressure, making it highly effective for dissipating heat in demanding electronic systems. Its 4-wire termination provides advanced functionality, including PWM control for precise speed management and a pulse sensor (tachometer) for real-time RPM monitoring. This fan is an ideal choice for servers, data centers, industrial control cabinets, power supplies, and other equipment where reliable, controllable, and efficient thermal management is crucial.

11925SA-12R-BM New original NMB 12V 0.86A high air volume 4-wire PWM speed regulating cooling fan

Model: 11925SA-12R-BM

Manufacturer: NMB Technologies Corporation

Type: DC Axial Fan

Dimensions: 119mm x 119mm x 25mm

Nominal Voltage: 12V DC

Current: 0.86A

Power Consumption: 10.32W

Speed: Approximately 3800 - 4200 RPM

Airflow: Approximately 140 - 160 CFM

Static Pressure: Approximately 0.45 - 0.55 In H2O

Noise Level: Approximately 50 - 55 dBA

Bearing Type: Ball Bearing

Life Expectancy: 40,000 hours at 60°C or 70,000 hours at 40°C

Termination: 4-wire leads

Frame Material: Plastic

Blade Material: Plastic

Features: PWM Control, Pulse Sensor (Tachometer), Auto-Restart, Polarity Protection
