Product Description

Model Number: 150FLJ7-22

Fan Type: AC Centrifugal Blower Fan

Rated Voltage: 220 VAC

Frequency: 50 Hz

Phase: Single-phase

Rated Current: 1.52 A

Input Power: 330 W

Rotational Speed RPM: 2800 RPM

Air Volume: 11 m³/min

Static Pressure: 450 Pa

Noise Level: 75 dB

Weight: 6 kg

Bearing Type: Ball Bearing

Operating Temperature Range: -40°C to +55°C

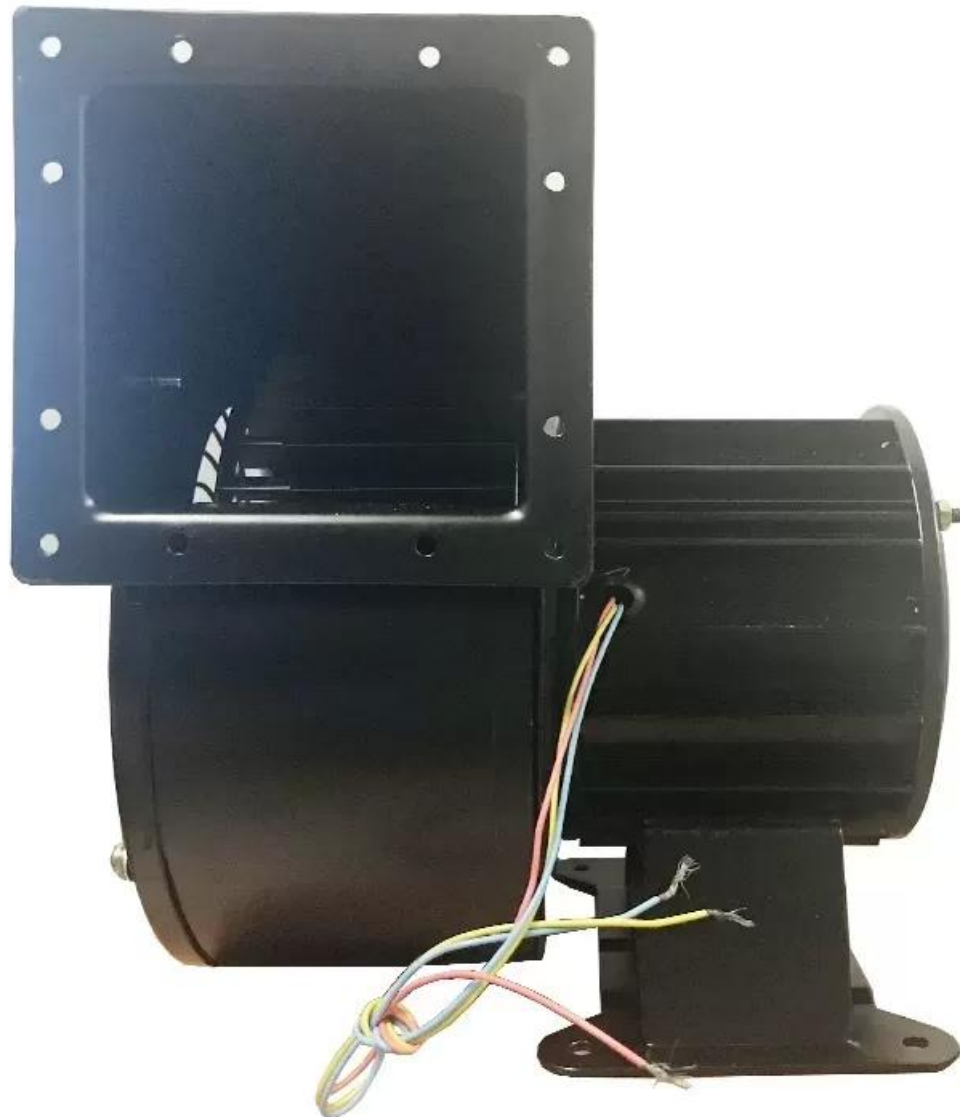

Brand new Bedel 150FLJ7-22 220V centrifugal fan capacitor running asynchronous motor blower

The 150FLJ7-22 is a powerful AC centrifugal blower fan designed for industrial cooling and air movement applications. Operating on 220 VAC single-phase power at 50Hz, it consumes 330W of power. This fan achieves a high rotational speed of 2800 RPM, delivering a substantial air volume of 11 m³/min and a strong static pressure of 450 Pa, making it suitable for pushing air through restrictive pathways. With a noise level of 75 dB and a weight of 6 kg, it's a robust solution for applications like industrial drying, furnace support, and general high-pressure ventilation.
