

150FZY9-D Beder 380V single-phase axial fan capacitance welding fan

SKU: 527745407207

Price: \$11.79

Categories: Fans

Tags: Bedel

Product Description

Model: 150FZY9-D/380V

Name: Axial fan/exhaust fan

Size: 160*160*60mm

Working voltage: AC380V-400V

Working current: 0.08A

Working frequency: 50/60Hz

Product power: 30W

Fan speed: 2600r/min

Product air volume: 330m³/h

Maximum static pressure: 0.45 Inch-H2O

Noise: 55 dB(A)

Weight: 900g

Frame material: die-cast aluminum alloy

Fan blades: plastic flame-retardant fan blades

Lifespan: 50000H

Working temperature: -20°C ~ 80°C

□Original□Beder 150FZY9-D 380V single-phase axial flow fan with capacitance and welding machine fan

1. Basic parameters and design features

Voltage specification: Supports 380V single-phase AC power supply, suitable for industrial power environment

Structural design: Adopts black thin body, compact size, suitable for internal installation of welding machines with limited space

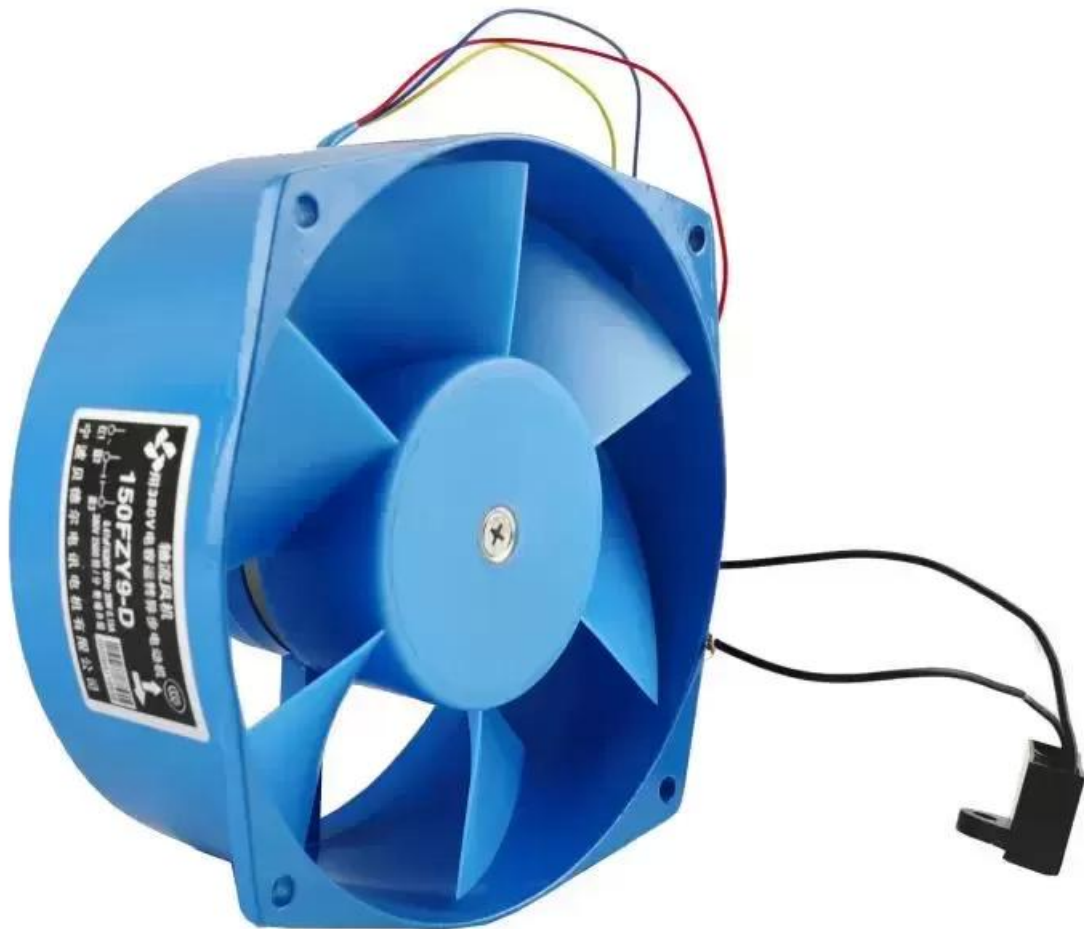

Capacitor configuration: Built-in starting capacitor to ensure stable operation of single-phase motor (specific capacitor parameters need to be consulted with the supplier)

2. Core application scenarios

Welding machine heat dissipation: Designed for inverter modules and single-tube heat dissipation of welding machines of brands such as Ruiling, which can quickly discharge equipment heat

Industrial compatibility: Applicable to industrial equipment with 380V voltage, such as distribution cabinets, inverters and other auxiliary heat dissipation scenarios
