Product Description

The NMB-MAT 1511FB-04W-B56 is a high-performance DC 12V axial fan. It stands out for its compact size, measuring 38x38x28mm, and its powerful cooling capabilities. Featuring a double ball bearing design, it offers excellent stability and durability during long operational periods. The 0.46A current indicates it provides substantial airflow for its size, which usually means higher fan speeds and greater cooling power. Its 4-pin connector supports PWM speed control, allowing systems to intelligently adjust the fan's RPM based on actual temperature. This ensures efficient cooling while minimizing noise and power consumption. This fan is frequently used in servers, workstations, and other professional electronic devices that demand high cooling performance and reliability.

1511FB-04W-B56 NMB original 3828 server fan machine 12V 0.46A 4-wire PWM temperature control

Model: 1511FB-04W-B56

Brand: NMB-MAT

Dimensions: 38x38x28mm

Voltage: DC 12V

Current: 0.46A

Connector: 4-pin 4-wire

Bearing Type: Double Ball Bearing

Application: Servers, computers, industrial control equipment

Material: Copper
