Product Description

3115RL-05W-B69 Schneider inverter 15-22KW original plug fan fan

The NMB 3115RL-05W-B69 is a robust 80x80x38mm DC axial fan well-suited for demanding cooling tasks, particularly in Schneider inverters and general server/industrial applications. Powered by 24VDC with a 0.50A current draw and 12W input, it delivers a high airflow of around 72-78.8 CFM and significant static pressure at approximately 4850-5200 RPM, with a noise level typically around 45-50 dB(A). Featuring dual ball bearings for enhanced durability and a long lifespan of at least 40,000 hours, this fan commonly uses a 3-wire connection for speed monitoring and includes fundamental protections against locked rotors and reverse polarity.
