Product Description

The NMB 3615RL-05W-B46 is a very powerful and robust 24V DC axial fan, measuring 92x92x38mm. Engineered by NMB Technologies, this fan is designed for aggressive cooling in demanding applications where high airflow and static pressure are critical. It features ball bearings for excellent durability and a long operational lifespan. Drawing 0.73A of current, it delivers an impressive 142 CFM of airflow and a substantial 1.04 In H2O of static pressure at a rapid 8500 RPM. With a noise level of 61.0 dBA, this fan prioritizes extreme cooling capability for its size. Its 4-wire termination provides advanced functionality, including PWM control for precise speed management and a pulse sensor for real-time RPM monitoring. This fan is an ideal choice for server cases, industrial inverters, power supplies, and other high-density electronic systems requiring efficient and controllable thermal management.

Brand new 3615RL-05W-B46 original NMB fan 24V 9238 ABB inverter cooling fan

Model: 3615RL-05W-B46

Manufacturer: NMB Technologies Corporation

Type: DC Axial Fan

Dimensions: 92mm x 92mm x 38mm

Nominal Voltage: 24V DC

Current: 0.73A

Power Consumption: 17.52W

Speed: 8500 RPM

Airflow: 142 CFM

Static Pressure: 1.04 In H2O

Noise Level: 61.0 dBA

Bearing Type: Ball Bearing

Life Expectancy: 70,000 hours at 40°C

Termination: 4-wire leads

Frame Material: Plastic

Blade Material: Plastic

Features: PWM Control, Pulse Sensor, Auto-Restart, Polarity Protection
