## Product Description

---

Part Number: A20B-1007-0930

Product Type: Internal Connecting / Interface Board

Equipment Category: Industrial Automation - Servo Systems

Belongs to Main Unit: Fanuc Servo Amplifier Module

Role in Unit: Connects Control PCB and Power PCB

Compatible Servo Series: Fanuc Alpha i Series Servo Amplifiers

Approximate Physical Dimensions: Internal board within module, no independent standard enclosure; specific dimensions depend on the servo amplifier model

Approximate Mass: Approx. 0.40 kg

Connector Types: Onboard various connectors and pins for internal board-to-board connection

Functional Characteristics:

Signal Transmission

Power Distribution between PCBs

Integrated into servo amplifier control loop

Protection Features: As part of servo amplifier, benefits from overall amplifier protection functions

Power Requirement: Provided by the servo amplifier's main circuit, no independent external power interface parameters.

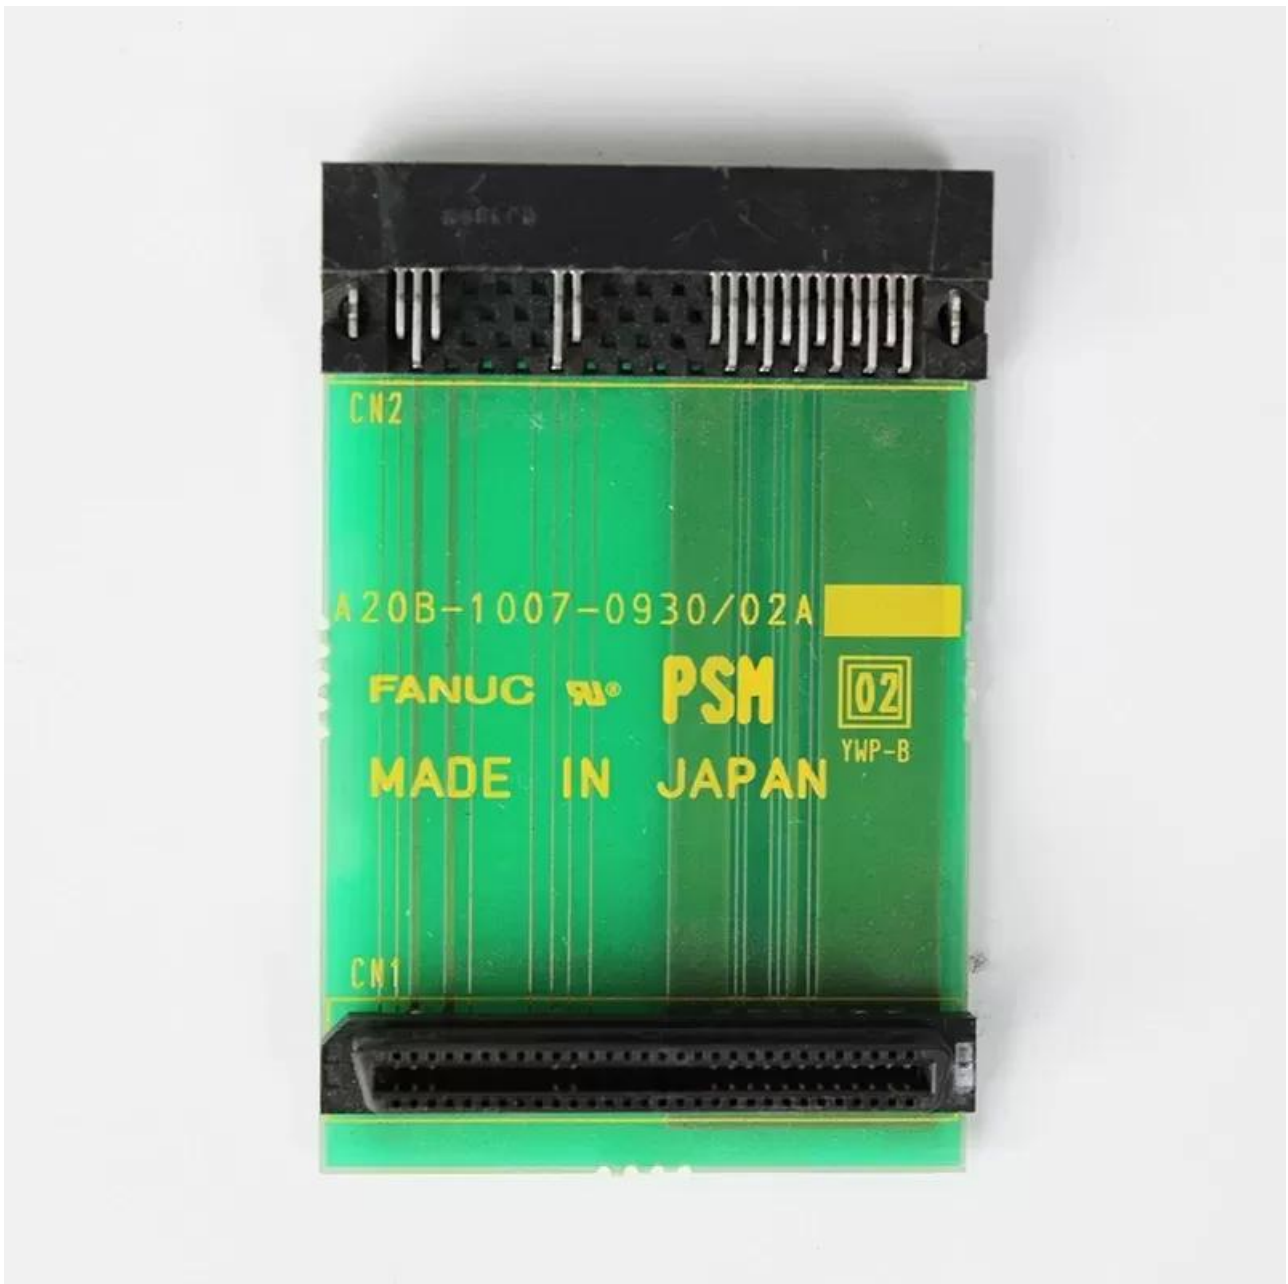

Communication Interface: Acts as an internal interface, connects communication circuits on Control PCB to power circuits, does not directly provide external communication interfaces.

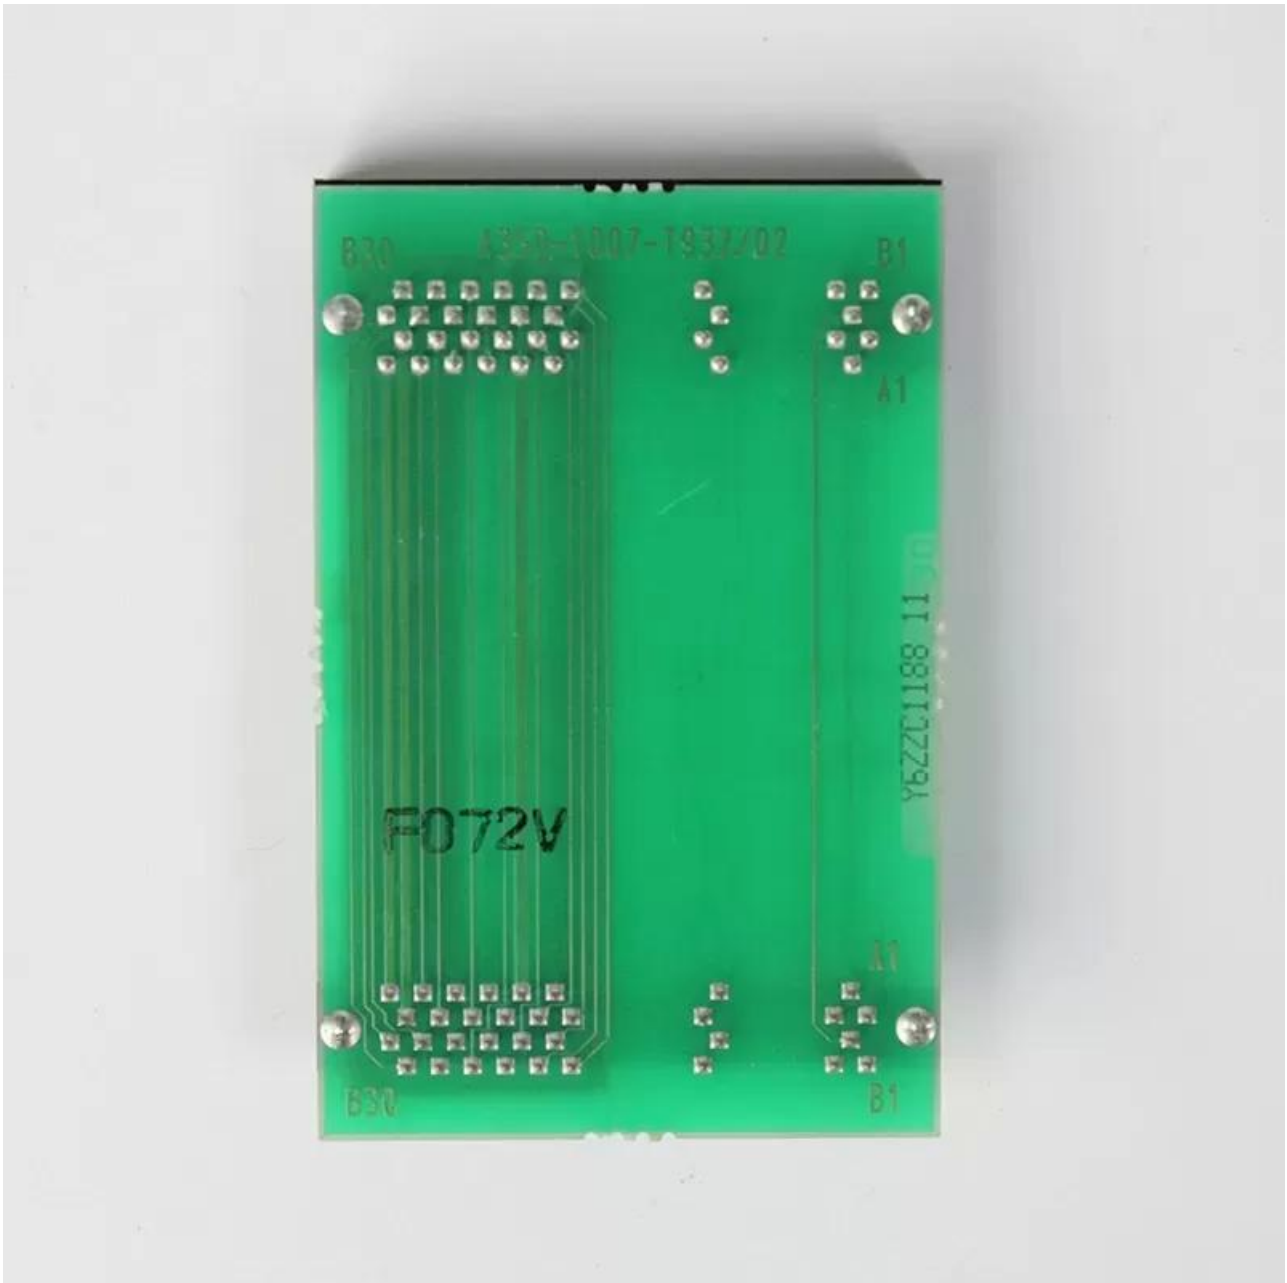

Known Sub-versions: A20B-1007-0930/01A, A20B-1007-0930/02A etc.

Typical Application: Internal to servo drive units in Fanuc CNC systems and robotic systems.

A20B-1007-0930 Original Fanak driver adapter board
