Product Description

The Sunon A2259-HBL.TC.GN is a powerful AC axial cooling fan, designed for robust thermal management in industrial equipment and cabinets. Measuring 254mm in diameter and 89mm in thickness, this large fan operates on 220-240VAC at either 50Hz or 60Hz. It consumes 60W of power, drawing a current of 0.27A. This enables it to achieve a high rotational speed of 2100 RPM, generating substantial airflow up to 650 CFM and a static pressure up to 0.35 inch-H₂O. Despite its powerful performance, its noise level is 62 dBA. The fan features ball bearings for enhanced durability and a long operational lifespan of approximately 50,000 hours. It comes with 2-wire leads for electrical connection and includes a thermal overload protector.
