## Product Description

---

Model:A2D210-AA02-11

Size:210mm

Voltage:AC400V

Current: 0.14A

Power: 80W

Speed:2700RPM

Lifespan:50000h

Weight:1.7KG

Bearing structure: ball bearing

Wiring method: lead type

Temperature range:-40~80°C

Frame leaves: high-grade metal

Brand:ebmpapst

A2D210-AA02-11 Germany imported ebmpapst 400V 0.14A 80W axial flow cooling fan

The ebm-papst A2D210-AA02-11 is a high-performance 400V AC double inlet centrifugal fan with a 210mm impeller, manufactured by ebm-papst. This robust fan is engineered for applications requiring efficient air movement with significant static pressure, making it ideal for systems with ductwork or air resistance. Operating at 2700 RPM, it delivers a substantial airflow of approximately 850 m<sup>3</sup>/h and strong static pressure. Featuring ball bearings and an integrated thermal overload protector, it ensures long-term durability and safety in continuous industrial operation. With its sturdy construction and a noise level typically in the 60-69 dBA range, this ebm-papst fan is a reliable choice for air handling units, ventilation systems, cooling for control cabinets, and various industrial equipment where powerful and consistent air circulation is

essential.
