Product Description

The ADDA AD0912XB-F91GP is a high-performance DC Axial Fan with dimensions of 92×92×38 mm. It operates on 12 VDC with a high Rated Current of 2 A and a calculated Rated Power of 24 W. The fan features a Ball Bearing system and is classified as Over Ultra High Speed. It is commonly supplied with a 2-Wire Leads termination. This fan is specifically designed for applications requiring extremely high airflow and static pressure from a compact 92 mm fan, such as high-end CPU coolers or dense rackmount server chassis.

AD0912XB-F91GP Fan Parameters

Model: AD0912XB-F91GP

Manufacturer: ADDA

Type: DC Axial Fan

Dimensions: 92×92×38 mm

Bearing Type: Ball Bearing

Operating Voltage: 12 V

Rated Current: 2 A

Rated Input: 24 W

Termination: 2-Wire Leads

Number of blades: 9

Frame Material: Plastic (PBT UL 94V-0), Glass-filled

Impeller Material: Plastic (PBT UL 94V-0)

Operating Temperature: -10 to +75 °C

Expected Life: 50,000 h (25 °C) (Minimum)

Application

The AD0912XB-F91GP is a powerful fan suitable for demanding cooling tasks where space is limited but maximum airflow and pressure are essential. Its primary uses are in high-performance computing equipment, server power supplies, and telecom devices that require an

Over Ultra High Speed fan to dissipate critical heat.
