Product Description

The Delta AFB0624SJ-01 is a high-performance 24V DC axial fan, measuring 60mm x 60mm x 25mm, manufactured by Delta Electronics. Engineered for powerful cooling in demanding electronic and industrial applications, this model features durable ball bearings for a long and reliable operational lifespan of 70,000 hours at 40°C. It draws 0.35A of current, consuming 8.4W of power, and operates at a very high speed of 8000 RPM. This results in a substantial 48.0 CFM of airflow and considerable static pressure of 0.811 inches of H2O, with a noticeable noise level of 53.0 dBA. This variant comes with 2-wire leads for basic power connection, omitting the speed sensor found in 3-wire versions. The Delta AFB0624SJ-01 is an excellent choice for cooling server equipment, networking devices, industrial control systems, and other high-density electronics where robust and reliable cooling is essential.

Model: AFB0624SJ-01

Manufacturer: Delta Electronics

Type: DC Axial Fan

Dimensions: 60mm x 60mm x 25mm

Nominal Voltage: 24V DC

Operating Voltage Range: 14.0V to 27.6V DC

Current: 0.35A

Power Consumption: 8.4W

Speed: 8000 RPM Airflow: 48.0 CFM

Static Pressure: 0.811 In H2O

Noise Level: 53.0 dBA Bearing Type: Ball Bearing

Life Expectancy: 70,000 Hours (at 40°C)

Termination: 2-wire leads Frame Material: Plastic Blade Material: Plastic

Features: Brushless DC motor, polarity protected.
