Product Description

The Crown AGJ15051B48V-JGZ is an exceptionally powerful DC axial fan, measuring 150x172x51mm. Operating on 48V DC and drawing a substantial 2.9A, it consumes 139.2W to deliver an astounding 514.87 CFM of airflow at an extreme speed of 7500 RPM. This fan is built for the most demanding thermal management challenges, providing maximum air movement even against high static pressure. With a considerable noise level of 74.4 dBA, its primary focus is uncompromised cooling performance. It's ideally suited for high-density server racks, large industrial machinery, telecommunications equipment, and other mission-critical systems that require aggressive and continuous heat dissipation.
