Product Description

The AVC DAZA0410R2H-015 is a compact and efficient DC cooling fan designed for effective heat dissipation in various electronic applications. This model operates at 12V with a low current draw of 0.06A, resulting in a power consumption of 0.72W. Its small 40x40x10mm size and standard 2-Pin connector make it an ideal choice for cooling components in confined spaces, commonly found in hard drive enclosures, network video recorders, and compact computer systems where reliable and quiet cooling is necessary.
