Product Description

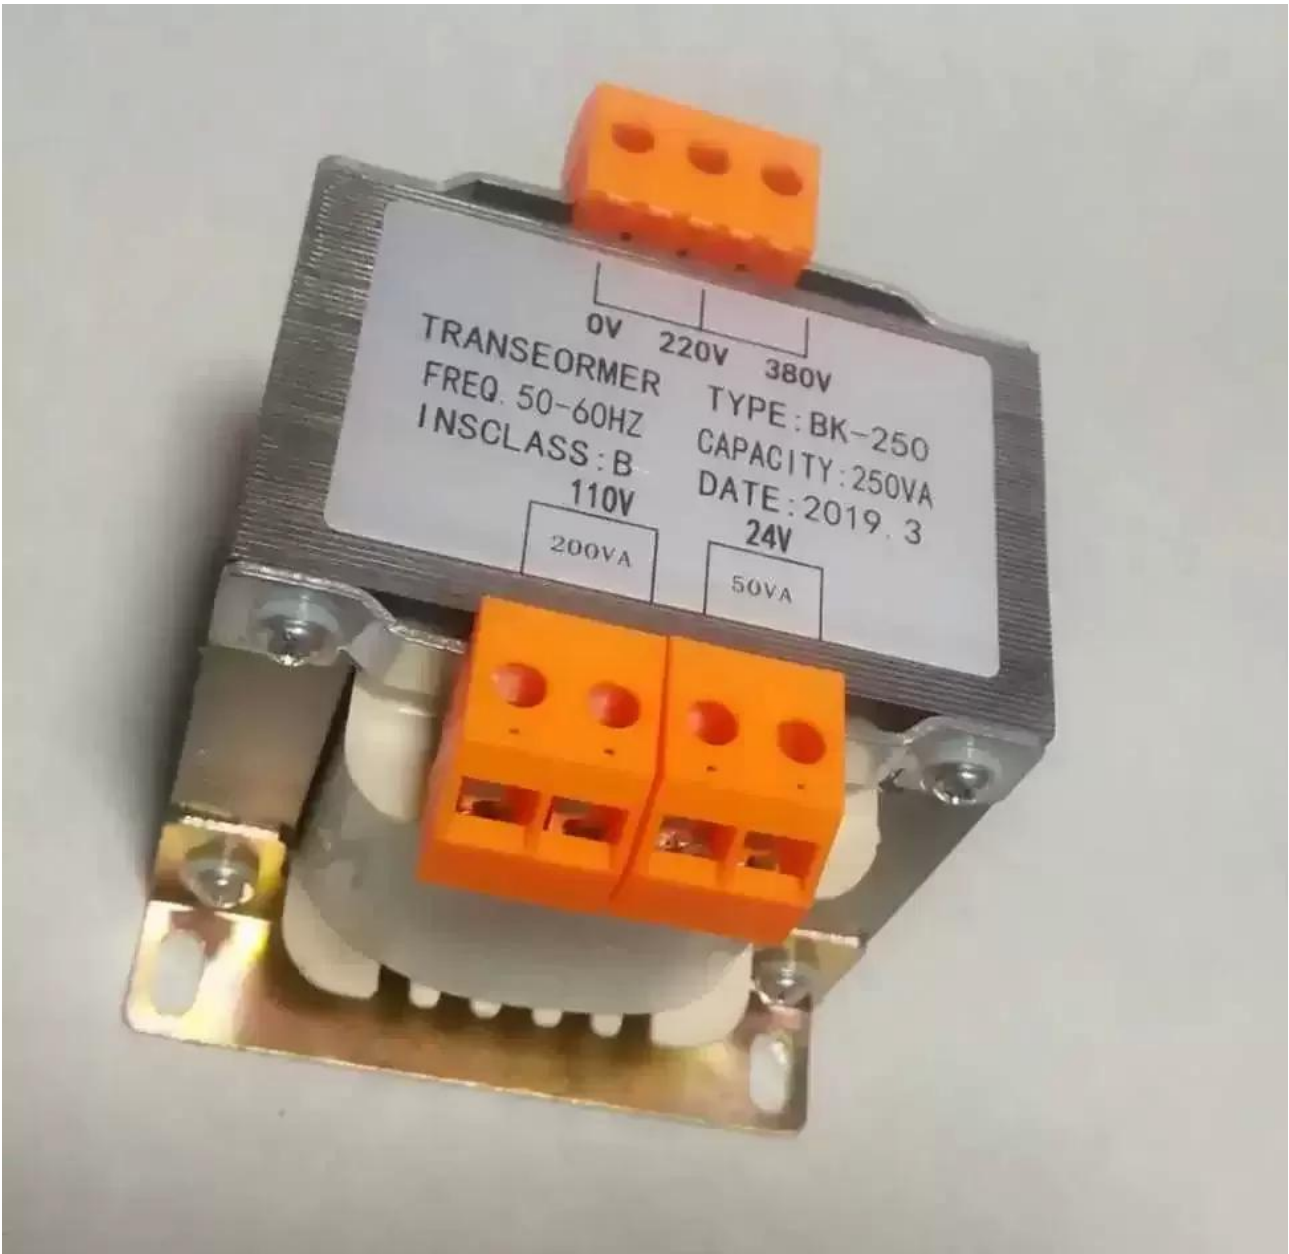

Our company specializes in the production of single-phase and three-phase dry-type transformers, elevator transformers, intelligent servo transformers, R-type transformers, BOD ring-type transformers, and CD-type transformers. We can customize various types of transformers according to customer requirements. The products use high-quality materials and key raw materials. All imported. Product quality meets national standard requirements, with low temperature rise, low loss, and high cost performance.

Our company has a professional technical team that can provide customers with technical support and solve their worries. New and old customers are welcome to consult.
