

D Series Air Cooler

SKU: 529014189441

Price: \$259.99

Categories: Refrigeration

Product Link: <https://www.electspares.com/product/d-series-air-cooler/>

Product Description

Air cooler DD/DJ/DL type ceiling-type/ceiling-type chiller/cold storage evaporator/cold storage refrigeration equipment

The shell is made of high-quality steel plate, the surface is sprayed with plastic, corrosion-resistant, beautiful appearance; ● Coil adopts staggered rows, the use of mechanical expansion of the tube, so that the copper tube and aluminum sheet closely combined, heat transfer effect is good; This online store and the entity factory synchronous operation, all goods are sold at a discounted price to earn a credit, welcome amateurs to visit. To provide you with favorable prices, quality service. We have a professional after-sales team, so that you buy at ease, with comfort!

□Product Name□D series air cooler (cold storage ceiling type/suction ceiling type chiller)

D series air cooler (also called chiller) is a kind of cooling and cooling equipment applicable to various cold storage (such as civil cold storage or combined cold storage).

D series air cooler has three types: DL, DD, and DJ, which are suitable for cold storage of different temperature. It has a compact structure, light weight, does not occupy the area of the cold storage, the temperature is uniform, so that the food stored in the cold storage quickly cool down, greatly improving the freshness of the stored food.

Product use

D series air cooler can be used with different refrigeration capacity of the compressor set, used in different library temperature of the cold storage, as refrigeration equipment, of which the DL type is suitable for the library temperature of 0 °C or so of the cold storage, such as preservation of fresh eggs or vegetables of the cold storage; DD-type is suitable for the temperature of the library of the cold storage of -18 °C or so of the temperature of the cold storage, as meat, fish and other frozen food refrigeration; DJ with the quick-freezing type of the cold storage library temperature of -25 °C or less than -25 °C mainly for meat, fish, frozen food; the temperature is -25 °C or less than -25 °C mainly used for meat, fish, frozen food, frozen food, meat, fish and other frozen food. 25 °C is mainly used for meat, fish, frozen food, drugs, herbs, chemical raw

materials and other items of low-temperature freezing.

Product use

1. The shell adopts plastic spraying process or rolled aluminum plate and surface spraying treatment, which has strong corrosion resistance and beautiful appearance.

2□The coiler is arranged in a novel way to reduce the wind side of the Yin force, after the set piece, and then through the hydraulic rise tube will be wrapped tightly in the aluminum fins on the copper tube, reduce the contact thermal resistance, improve the efficiency of heat transfer.

3□After the product is tested and pressed, it is then cleaned by trichloroethylene in the tube to remove the oil, water and oxidized skin in the tube. When the user charges the refrigerant, there will be no faults such as expansion valve blockage due to debris and oil in the system.

4, the use of special fan motor, low power consumption, large air volume, low noise, range, to ensure that the normal operation of the state of humidity and low temperature.

5□U-shaped tubular electric heaters with strong insulation are used, and the electric heaters are inserted into the coiler, with reasonable spacing distribution and power design, short frost melting time and good effect.

6□Adopting slot hanger, easy to install.

7□All of them are nitrogen-filled under pressure before leaving the factory.

Additional Information
