Product Description

Model: DV4650-470

Size: 12X12X3.8cm

Voltage: 220V

Power: 19W

Speed: 2600RPM

Air volume: 94.2CFM

Noise: 46dB

The DV4650-470 is a high-performance centrifugal fan from ebm-papst, a global leader in energy-efficient air and drive technology. Designed for demanding industrial and HVAC applications, this fan delivers reliable airflow with optimized energy consumption.

Key Features:

Type: Centrifugal fan with backward-curved blades

Airflow & Pressure: High static pressure capability (470 Pa) for efficient ventilation

Motor: Electronically commutated (EC) motor for superior energy efficiency

Speed Control: Adjustable via PWM or 0-10V signal for precise operation

Noise Level: Low-noise design for reduced operational disturbance

Durability: Robust construction for long service life in harsh environments

Applications:

Industrial ventilation

HVAC systems

Air handling units (AHUs)

Process cooling

Advantages:

- Energy-saving – EC technology reduces power consumption
- Smart control – Easy integration with automation systems
- Low maintenance – Brushless motor ensures minimal wear

The DV4650-470 combines efficiency, reliability, and intelligent control, making it ideal for modern air management solutions.
