Product Description

The Delta EFB1524SHG-T6LA is a powerful 24V DC axial cooling fan from Delta Electronics. Measuring 172mm x 150mm x 50.8mm, this fan is designed for demanding thermal management in industrial equipment, servers, and power supplies, including ABB inverters. It operates at a rated voltage of 24V DC and draws a current of 2.1A, resulting in a power consumption of 50.4W. This high power input enables it to achieve a rapid speed of 4300 RPM, generating a substantial airflow of 325 CFM and a static pressure of 1.083 inch-H₂O. Despite its high performance, it maintains a noise level of 63 dBA. The fan is constructed with a durable aluminum frame and plastic blades, and it features ball bearings for an extended operational lifespan of typically 80,000 hours at 40°C. This particular variant comes with 2-wire leads, providing straightforward power and ground connections.
