Product Description

The Emerson EX2-100 series pulse-type electronic expansion valve accurately controls the flow of refrigerant by controlling the pulse width. Commonly used in freezing and industrial refrigeration processes.

To ensure that the valve of girls can be non-operating

Features

- Pulse width adjustment
- Full shut-off function eliminates the need for additional solenoid valves
- Anti-impact plunger minimizes the noise of refrigerant liquid column
- One valve body can be used in combination with 6 types of valve cores and 7 refrigeration capacity ranges ·Suitable for all common refrigerants (HCFC, HFC) and CO (subcritical) ·The pipe connection is ODF
- Long life and high reliability
- Standard coil ESC (need to be purchased separately)·Operating temperature range: -40~+50°C·Maximum operating pressure: 40 bar
- Maximum operating pressure difference: 30 bar. UL/CUL certificate: MP604
