Product Description

Manufacturer: ZIEHL-ABEGG

Model: FN063-6EK.4I.V7P1

Product Type: Axial Fan

Motor Technology: AC External Rotor Motor

Impeller Diameter: 630 mm

Number of Blades: 6 Sickle blades

Bearing Type: Ball Bearing, with long-time lubrication

Protection Class: IP54

Thermal Class: THCL155

Electrical Connection: Terminal box K62

Design: K

Airflow Direction: V Ventilating, air blows over the motor side

Weight: Approximately 15.4 kg slight variations between sources

Minimum Operating Temperature: -25 °C

Maximum Medium Temperature: 70 °C

Conformity: ErP 2015, CE

Parameters at 50Hz Operation 1 ~ 230V ±10%:

Frequency: 50 Hz

Rated Power Input P1: Approximately 660 W - 760 W slight variations between sources

Rated Current IN: Approximately 3.0 A - 3.7 A slight variations between sources

Rated Speed nN: Approximately 860 RPM - 870 RPM

Service Capacitor: 12 µF / 400V

Airflow: Approximately 10100 m³/h - 12547 m³/h significant variation between sources, depends

on static pressure operating point

Noise: Approximately 66 dB - 74 dB(A) significant variation between sources, different measurement standards or operating points, refer to the official performance curve diagram for detailed values
