Product Description

The FP-108K S1-B is a widely available AC Axial Cooling Fan commonly used for cabinet and equipment cooling. It operates on 220V to 240V AC power, drawing 0.30A of current for a 44W power consumption across both 50Hz and 60Hz frequencies. Measuring 222mm x 212mm x 60mm, this substantial fan operates at speeds around 2400 RPM at 50Hz and up to 2800 RPM at 60Hz, delivering a high airflow of approximately 360 CFM and a static pressure of 0.9 inH₂O. It produces a noise level of around 56 dBA. Featuring a durable die-cast aluminum alloy frame and a PBT plastic impeller, and equipped with 2-wire leads and a double ball bearing system, the FP-108K S1-B is built for long-term reliability in various industrial and electronic applications requiring significant cooling.

Manufacturer: Commonwealth

Model Number: FP-108K S1-B

Type: AC Axial Cooling Fan

Rated Voltage: 220V - 240V AC

Frequency: 50Hz / 60Hz

Rated Current: 0.30A

Rated Power: 44W

Speed: 2400 RPM / 2800 RPM

Airflow: 360 CFM

Static Pressure: 0.9 inH₂O

Noise Level: 56 dBA

Dimensions: 222mm x 212mm x 60mm

Connector: 2-Wire Leads

Bearing Type: Double Ball Bearing

Life Expectancy: Typically 50,000 hours

Frame Material: High temperature resistant die-cast aluminum alloy

Impeller Material: PBT plastic
