Product Description

The German D2D133-DB08-27 Heidelberg fan (part number FS.102.3106, motor M2D068-DF) is a double-inlet centrifugal fan manufactured by ebm-papst. It features a 133mm impeller diameter and is specifically designed for Heidelberg printing presses. Operating at 400V AC (50Hz), its rated current ranges from 0.30A to 0.36A, with an input power of 190W to 255W. This fan runs efficiently at a rated speed of 2100 RPM, ensuring the precise airflow and cooling required by printing equipment.
