## Product Description

---

The Jiulong G9025HA2BL is a standard 92x92x25mm AC axial fan designed for cooling various electronic components and industrial equipment. It operates on 220 VAC at 50/60 Hz, drawing 0.07A of current and consuming 13W of power. This fan typically provides an airflow between 23 to 37 CFM and operates with a noise level in the range of 23 to 40 dB(A). It utilizes ball bearings for reliable performance and often features an aluminum alloy frame with PBT thermoplastic impeller blades, making it suitable for server cooling, power supplies, and control cabinets.
