Product Description

The Delta GFB0812SHG-7C34 is an extremely powerful 12V DC axial fan measuring 80x80x48mm, engineered for aggressive cooling in highly demanding electronic systems. Featuring ball bearings, it ensures exceptional durability and an extended operational lifespan of 100,000 hours. This fan delivers a very high 70.6 CFM of airflow at 4200 RPM and notable static pressure, making it incredibly effective at dissipating heat from densely packed components. With a noise level of 53 dBA, it prioritizes maximum cooling performance. Its 4-wire termination provides PWM control for precise speed management and a tachometer output for real-time RPM monitoring, making it an ideal choice for high-reliability server cooling, switching power supplies, and other critical industrial applications where robust, controllable, and continuous thermal management is absolutely essential.

Delta Brand new original authentic GFB0812SHG-7C34 12V 1.10A 8050 cooling fan

Manufacturer: Delta Electronics

Model: GFB0812SHG-7C34

Type: DC Axial Fan

Dimensions: 80mm x 80mm x 48mm

Nominal Voltage: 12V DC

Current: 1.1A

Power Consumption: 13.0W

Speed: 4200 RPM

Airflow: 70.6 CFM

Static Pressure: 0.445 In H2O

Noise Level: 53 dBA

Bearing Type: Ball Bearing

Life Expectancy: 100,000 hours at 40°C

Termination: 4-wire leads

Frame and Blade Material: Plastic

Features: Locked Rotor Protection, PWM Control, Speed Sensor (Tachometer), Auto-Restart
