Product Description

The FASCO J238-087-8218 is a specialized UL-certified AC Blower Motor, engineered for reliable air circulation within industrial and laboratory appliances. It operates on 115V AC power, supporting both 50Hz and 60Hz frequencies, and draws 0.41A of current. This motor is typically equipped with ball bearings for robust and extended operational life. Its primary applications include providing air movement within imported baking ovens, drying boxes, and various types of experimental equipment where precise and consistent air circulation is required.

J238-087-8218 Fan Parameters

Model: J238-087-8218

Manufacturer: FASCO

Type: AC Blower Motor

Nominal Voltage: 115 V AC

Frequency: 50/60 Hz

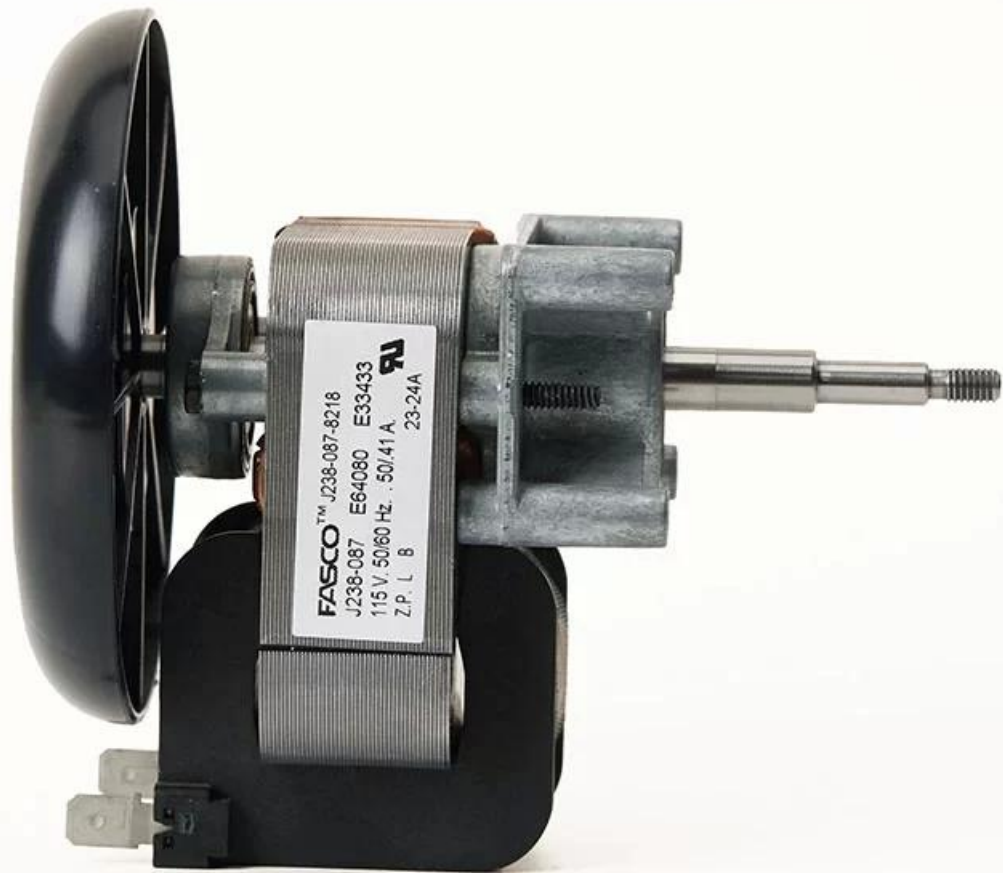

Current Draw: 0.41 A

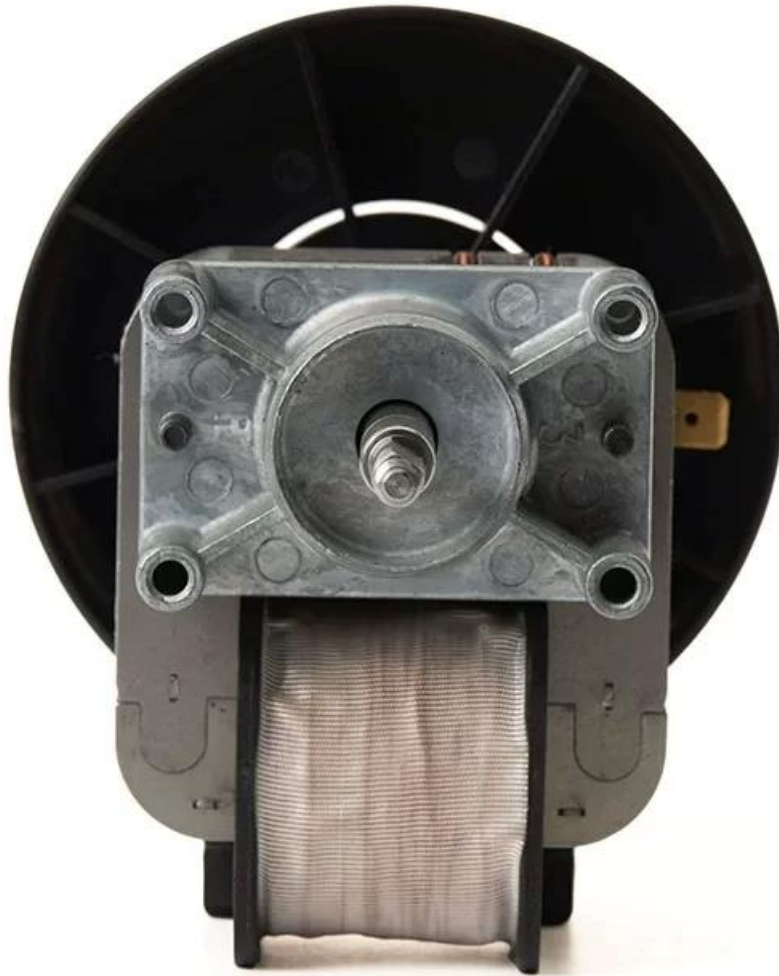

Bearing Type: Ball Bearing

Certifications: UL
