Product Description

The KAKU KA1606HA2 is a robust 160x160x65mm AC axial fan designed for industrial cooling and ventilation applications where dust and moisture resistance are required. Operating on a 220V to 240V AC power supply at both 50Hz and 60Hz, this fan precisely draws 0.24A (50Hz) or 0.19A (60Hz) of current. This translates to a power consumption of approximately 55.2W (50Hz) or 43.7W (60Hz). It achieves rotational speeds of 2800 RPM (50Hz) and 3300 RPM (60Hz), delivering significant airflow. With a low noise level of 59 dB(A) (50Hz) or 63 dB(A) (60Hz) and utilizing a durable ball bearing system, this model is built for long-term reliability in harsh environments.
