Product Description

The Protechnic MGT9224YB-O20 is a versatile 92x92x25mm DC axial fan designed for effective cooling in various electronic applications. Operating on a 24V DC power supply, this fan precisely draws 0.4A of current, consuming 9.6W of power. It achieves a rotational speed of 3800 RPM, delivering reliable airflow for thermal management. Utilizing dual ball bearings, this model is built for durability and consistent performance. Its compact size and robust specifications make it suitable for a range of cooling needs in electronic components and systems.
