Product Description

MR-PWCNS1 22-23S Mitsubishi servo motor cable 8-core high-power power cable spot bargaining

This robust connector is specifically designed for Mitsubishi MELSERVO-J2S, J3, J4, and JN series servo systems, ensuring seamless compatibility and optimal performance. It features a 22-23S shell size and contact arrangement, engineered to securely deliver power to your servo motor.

Whether you're replacing a damaged connector, building custom-length cables, or maintaining your industrial automation equipment, the MR-PWCNS1 22-23S provides a dependable and secure connection. Its durable construction is built to withstand demanding industrial environments, ensuring consistent power delivery for your high-precision applications.

While often sold as a connector component, this part is integral to the complete Mitsubishi servo motor power cable assembly. Ensure your machinery runs smoothly with this genuine Mitsubishi connector.
