Product Description

The Delta PFB0824UHE-JBS is an extremely powerful 24V DC axial fan measuring 80x80x38mm, engineered for demanding cooling in high-performance electronic systems. Equipped with ball bearings, it ensures superior durability and a long operational lifespan of 50,000 hours. This fan delivers an impressive 107.3 CFM of airflow and a high static pressure of 1.368 In H2O at 7500 RPM, making it exceptionally effective at dissipating heat from densely packed components. With a noise level of 61 dBA, it prioritizes powerful cooling. Its 4-wire termination provides PWM control for precise speed management and a tachometer output for real-time RPM monitoring, making it an ideal choice for servers, industrial machinery, and other critical systems where robust and controllable thermal management is essential.

Delta new original authentic PFB0824UHE 24V 8038 4-wire inverter fan machine

Manufacturer: Delta Electronics

Model: PFB0824UHE-JBS

Type: DC Axial Fan

Dimensions: 80mm x 80mm x 38mm

Nominal Voltage: 24V DC

Current: 0.93A

Power Consumption: 22.32W

Speed: 7500 RPM

Airflow: 107.3 CFM

Static Pressure: 1.368 In H2O

Noise Level: 61 dBA

Bearing Type: Ball Bearing

Life Expectancy: 50,000 hours at 40°C

Termination: 4-wire leads

Frame and Blade Material: Plastic

Features: Locked Rotor Sensor, Auto-Restart, Brushless DC Motor, PWM Control, Tachometer Output
