Product Description

The ebm-papst R2E175-AC91-05 is a high-performance, 400V AC centrifugal fan specifically engineered with backward-curved impellers for applications demanding efficient air movement against high static pressure. Its robust design, incorporating ball bearings and an IP44 rating, ensures reliable operation and extended service life within a wide operating temperature range of -25°C to +70°C, making it a critical component for industrial and commercial HVAC, cooling, and ventilation systems.
