## Product Description

---

The ebmpapst R3G190-RB01-06 is a high-efficiency 230VAC EC centrifugal fan with a 190mm impeller diameter, designed for precise air movement. It operates at 2490 RPM, drawing 0.43A for 44W of power, and features durable ball bearings. Weighing 0.96 kg, it's constructed with a PA plastic impeller and die-cast aluminum housing, offering IP54 protection and reliable performance within a -25°C to 60°C temperature range.

Fan Type: EC Centrifugal Fan (Backward-curved)

Model: R3G190-RB01-06

Impeller Diameter: Ø190 mm

Voltage: 230VAC

Frequency: 50/60 Hz

Current: 0.43A

Power Input: 44W

Speed: 2490 RPM

Bearing Type: Ball bearings

Weight: 0.96 kg (or approximately 1 kg)

Impeller Material: PA plastic

Electronics Housing: Die-cast aluminum

Protection Class (IP Rating): IP54

Operating Temperature Range: -25°C to 60°C

R3G190-RB01-06 200-240V 44W inverter equipment imported from Germany uses fan
