## Product Description

---

The Reeven RA1225F12C-P is a high-performance DC Axial Fan with dimensions of 120 x 120 x 25 mm. This fan operates on 12VDC and utilizes a high-durability FDB (Fluid Dynamic Bearing). It runs at a fixed speed of 1200RPM, delivering an airflow of 78.8m<sup>3</sup>/h (46.4CFM) and generating a static pressure of 0.049inAq (12.2Pa). This fan is ideal for silent and efficient case or CPU cooling in desktop computers and electronic enclosures.

Parameter	Value
Model	RA1225F12C-P
Manufacturer	Reeven
Type	DC Axial Fan
Dimensions	120x120x25mm
Nominal Voltage	12VDC
Rated Current	0.12A
Input Power	1.44W
Bearings	FDB Bearing
Speed	1200RPM
Airflow	78.8m <sup>3</sup> /h (46.4CFM)
Static Pressure	12.2Pa (0.049inAq)
Noise Level	22.3dBA
MTTF	120,000hrs

### Application

The RA1225F12C-P is primarily used for enhanced thermal management in computing environments. Its high-durability FDB bearing and low noise level make it an excellent choice for PC case ventilation, CPU air coolers, and other applications in quiet gaming rigs or professional

workstations requiring reliable and efficient airflow.
