## Product Description

---

REFCO is a Swiss company founded in 1972 and has successfully grown from a small business into a world-renowned supplier of refrigeration service products and components. Producing high-quality products has been our consistent goal from beginning to end. Combining our customers' special requirements with our production technology to produce unique products that are durable and safe is a top priority in our development.

Schematic interpretation of valve and joint connection;

1. Close signal:

When the 1# hand valve is closed clockwise

willIn40o5o0

2# and 4# are connected

300200

There is no connection between 3# and 2#4#

19ecinH

2. Turn on the signal:

When 1# hand valve is opened counterclockwise, 2# and 4# are connected.

3# and 2#4 are also connected
