Product Description

The ZIEHL-ABEGG RH63N-4DK.6N.AR is a robust 3-phase AC Centrifugal Fan with a nominal diameter of 630 mm, designed as a motorized impeller (RH..N series). It operates on a 400 V power supply at 50 Hz. This fan is built with high-quality components, featuring a high thermal class (155) and IP54 protection, making it a reliable solution for demanding industrial ventilation, large-scale air conditioning, and process air handling applications requiring high volume flow and pressure capabilities.

Fan Parameters

Manufacturer: ZIEHL-ABEGG

Model: RH63N-4DK.6N.AR

Type: Centrifugal Fan

AC/DC: AC

Phase: 3~

Voltage: 400 V

Frequency: 50 Hz

Thermal class: 155

Protection: IP54

Motor protection: Thermal contacts

Dimensions: 630 mm (Impeller diameter)

Impeller material: Galvanised sheet metal

Motor housing finish: RAL 7032 (Pebble grey)

Application

Large-scale industrial ventilation, air handling units (AHUs), refrigeration technology, and process heating/drying plants where high airflow and static pressure are critical.
