Product Description

The S4D350 8317072917 is a 350mm axial flow fan manufactured by ebm-papst, specifically designed for efficient cooling. It's widely used in applications like air conditioning condensers, cold storage units, and various industrial and commercial settings. Powered by 230V/400V AC, it operates at 1410 RPM and features durable cast iron blades and a ball-bearing motor. With an IP44 protection rating, it ensures long-term, stable operation even in demanding environments. ebmpapst S4D350 three-phase asynchronous motor M4D074-DF cold storage cooling fan fan motor
