Product Description

The Sanju SJ1751HD2 is a large and exceptionally powerful 24V DC axial fan, measuring 172x150x51mm. It's designed for serious thermal management in demanding industrial and commercial settings. With ball bearings, this fan offers excellent durability and a long operational lifespan. It delivers a massive 345 CFM of airflow at an impressive 4500 RPM, making it incredibly effective at moving large volumes of air and dissipating heat. Operating at 63 dBA, its focus is on maximum performance. This fan is an ideal choice for large electronic enclosures, industrial machinery, and high-density server racks where powerful and reliable air movement is critical for system stability.
