## Product Description

---

The Nidec V12E24BGB5-52 is a powerful 120x120x38mm DC axial fan designed for extreme cooling demands, commonly found in servers, inverters, and high-density electronic enclosures. Operating on 24VDC with a substantial 1.40A current draw and 33.6W input power, it boasts a very high rotational speed of approximately 6400 RPM, delivering an impressive airflow of around 209.7 CFM (5.94 m<sup>3</sup>/min). Equipped with durable dual ball bearings for extended reliability, this fan typically features a 3-wire connection for speed monitoring and includes essential locked rotor and reverse polarity protection, ensuring robust and long-lasting thermal management in critical applications.
