Product Description

Weiguang external rotor axial flow fan motor

1. This product is Hangzhou Weiguang YWF series external rotor axial flow motor.
2. The standard length of the fan power supply lead-out is 1.5 meters, made of all-copper core wire, and a junction box is also available.
3. D and E in the model number refer to the voltage of 380V and 220V respectively.
4. The difference between 4D and 6D is the number of poles (that is, the number of revolutions). The power, revolutions, and air volume are all larger in 4D, but the sizes of 4-pole and 6-pole in the same product are exactly the same. The same is true for 4E and 6E.
5. This product is an all-in-one machine with motor, grille and fan blades. The price you take is the price of the complete machine. A single accessory is not retail.

Additional Information

sort by color: YWF4D-550S [380V suction line version], YWF4D-550S [junction box model], YWF6D-550S [6D speed is slower than 4D], YWF6D-550S [junction box model], YWF4E-550S [220V suction line version], YWF6E-550S [6E speed is slower than 4E], Separate outer rotor grille: equipped with blade diameter 550, YWF4D-550B□Blow dryer 380V□, The junction box version has a higher outdoor protection level!, We have the Shimmer brand authorization ~ it's more reliable!, Please contact customer service for freight and invoice matters.
