Product Description

Weiguang outer rotor YWF4D4E6D6E-630S/6D-710S/6D-800S axial flow fan cooling fan

1□This product is Hangzhou Weiguang YWF series external rotor axial flow motor.

2. The standard length of the fan power supply lead wire is 1.5 meters, which is made of all copper core wire, and there is also a junction box for choice.

3. D and E in the model number refer to voltage 380V and 220V respectively.

4, 4D and 6D is the difference between the number of poles (that is, the number of revolutions is different), power, number of revolutions, air volume are 4D's big, but the same product under the 4 pole and 6 pole size is exactly the same. 4E and 6E is the same thing.

5, this product is the motor, mesh and wind blade all-in-one machine, you photographed is the price of the whole machine, a separate accessory is not zero-sale.

YWF4D-630S [380V air suction regular model]

YWF4D-630S [junction box model]

YWF6D-630S [6D speed is slower than 4D]

YWF6D-630S [junction box model]

YWF4E-630S [220V air suction regular model]

YWF4E-630S [junction box model]

YWF6E-630S [6E speed is slower than 4E]

Separate outer rotor grille: equipped with blade diameter 630

YWF6D-710S [380V air suction ready stock]

YWF6D-800S [380V air suction ready stock]

The junction box version has a higher outdoor protection level!

We have the Shimmer brand authorization ~ it's more reliable!

Please contact customer service for freight and invoice matters.
