## Product Description

---

The SNOWFAN YY9232H24B is a high-performance 24V DC Axial Fan with dimensions of 92×92×32 mm. Operating at its rated 24 VDC, it draws a nominal current of 0.90 A, resulting in a powerful 21.6 W consumption. Featuring a 7-bladed plastic impeller and a durable Ball Bearing system, this model delivers a robust cooling solution for demanding industrial and electronic applications.

YY9232H24B Fan Parameters

Model: YY9232H24B

Manufacturer: SNOWFAN

Fan Type: DC Axial Fan

Dimensions: 92×92×32 mm

Nominal Voltage: 24 VDC

Rated Current: 0.90 A

Rated Power: 21.6 W

Number of Blades: 7

Frame Material: Plastic

Impeller Material: Plastic

Bearing System: Ball Bearing

Termination Type: 2 Wires

Operating Temperature: -10°C to +70°C

Safety Approvals: CE, CSA, UL, VDE

Application

The YY9232H24B is specifically designed for high-power cooling requirements in applications such as industrial control cabinets, automation equipment, power supplies, and inverters, where a reliable 24V DC fan is needed to handle high thermal loads.
